

BRIAN BAUER

Senior Technical Program Manager | Cloud Architect | DevSecOps Engineer

Madison / Huntsville, AL | (256) 698-1166 | brianbauer007@gmail.com | [LinkedIn Profile](#)

EXECUTIVE PROFILE

Senior Technical Program Manager, Cloud Architect, and DevSecOps platform leader with defense-contractor experience delivering SPDS for Army software modernization. Designed and architected secure multi-tenant cloud and DevSecOps platform patterns across AWS GovCloud, Zero Trust access, CI/CD, Infrastructure as Code, tenant onboarding, certified pipeline capabilities, and platform execution. Bridges hands-on architecture with program leadership, stakeholder alignment, compliance evidence, delivery governance, and roadmap execution across mission-focused engineering teams.

DevSecOps Platforms Secure software factory patterns, certified CI/CD pipelines, GitOps, IaC, release automation, tenant onboarding	Cloud Architecture AWS GovCloud, Azure, multi-tenant landing zones, account/network boundaries, Zero Trust access patterns	Program Leadership Roadmaps, stakeholder execution, architecture governance, accreditation alignment, cross-team delivery
---	--	---

TECHNICAL SKILL SET

Cloud & Platform	AWS GovCloud, Microsoft Azure, landing zones, multi-tenant platforms, Kubernetes, service platforms, cloud operations
DevSecOps & Automation	GitLab, Azure DevOps, Jira, Nexus Repository, CI/CD, GitOps, Terraform, Packer, PowerShell, IaC, policy-aligned automation
Security & Reliability	Zero Trust access design, STIG-aligned automation, SRE, SLOs, HA/DR, observability, service readiness, compliance evidence
Data & Systems	SQL Server, Windows Server, Linux/RHEL, IIS, Oracle support, database availability, backup/recovery, performance troubleshooting

PROFESSIONAL EXPERIENCE

Senior Technical Program Manager | SAIC

August 2025 - Current

Huntsville, AL

- Lead SPDS program execution as a defense contractor supporting Army software modernization, embedded software delivery, and secure government/industry collaboration.
- Coordinate roadmap, priorities, delivery risks, stakeholder expectations, cybersecurity inputs, accreditation needs, and cross-team execution across SPDS platform workstreams.
- Drive alignment between Army stakeholders, engineering teams, assurance partners, contractors, and leadership to turn mission requirements into executable platform outcomes.
- Oversee delivery patterns for tenant onboarding, certified DevSecOps pipeline capabilities, Zero Trust partner access, cloud operations, and secure software delivery governance.

Cloud Comp Engineer Senior Management | SAIC

June 2023 - August 2025

Huntsville, AL

- Served as primary architect for the SPDS platform, designing the cloud-hosted DevSecOps environment, multi-tenant architecture, secure account/network boundaries, and repeatable tenant delivery model.
- Architected SPDS in AWS GovCloud using landing-zone concepts, Infrastructure as Code patterns, cloud governance, automation, and secure platform baselines for mission software teams.
- Designed scalable Defense Industrial Base partner access and on-prem hardware-in-the-loop integration patterns using Zero Trust principles rather than one-off application exceptions.

- Integrated platform capabilities across GitLab, Azure DevOps, Jira, Nexus Repository, package/container governance, CI/CD pipelines, and automated compliance evidence workflows.
- Established platform architecture direction for secure DevSecOps, certified pipeline enablement, software factory patterns, tenant onboarding, and operational repeatability.

Senior Manager - Site Reliability Engineering | Hexagon PPM

2021 - 2023

Madison, AL

- Managed a global SRE team focused on DevOps, CI/CD, automation, Microsoft Azure cloud operations, Terraform, Kubernetes, and production reliability.
- Led design and deployment of a global multi-tenant application platform using Infrastructure as Code and Continuous Delivery practices.
- Product Owner for a Kubernetes-based multi-tenant service platform and introduced the organization's first formal SRE function.
- Developed monitoring, automation, service readiness, and operational standards to improve SLO management and production ownership maturity.

DevOps Consultant | Hexagon PPM

2017 - 2021

Madison, AL

- Lead DevOps Engineer for globally available, business-critical cloud licensing applications.
- Led cloud-first patterns across CI/CD, release management, automation, zero-downtime deployment, Azure, AWS, Infrastructure as Code, and operations.
- Integrated Terraform Cloud into CI/CD workflows and designed pipelines for deployments to Azure and AWS from Azure DevOps.
- Migrated on-premise applications to Azure while improving release consistency, deployment repeatability, and operational supportability.

Database Administrator | Intergraph

2014 - 2018

Madison, AL

- Administered SQL Server environments including security, sizing, backups, replication, log shipping, Availability Groups, and database mirroring.
- Automated routine and complex procedures using custom PowerShell modules and scripts.
- Designed redundant systems, policies, and procedures for disaster recovery and high availability.

Software Support Engineer | Intergraph

2007 - 2014

Madison, AL

- Troubleshoot, configured, and supported Intergraph public safety products across Windows Server, SQL Server, Oracle, IIS, SSIS, and GIS workflows.
- Created testing, QA, and training environments and delivered instructor-led training for government, Army, university, and law enforcement end users.
- Provided critical 24/7 support to public safety system administrators and supported GIS production/data-integration workflows.

EDUCATION, CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Education	Certifications	Professional Development
A.S., Business Administration - Calhoun Community College, Huntsville, AL	CompTIA Security+ CE AWS Certified Cloud Practitioner	Microsoft DevOps FastTrack; SQL Server administration; PowerShell automation; Customer service leadership
